## SUMMARY

Bachelor of Computer Science in Information Technology with a background in web development and software testing. Currently working as a Quality Assurance Tester in the banking sector (Bank Syariah Indonesia), focusing on system integration testing and digital product quality.

## EXPERIENCES

### Bank Syariah Indonesia

(April 2025 – Now)

SIT Tester – Contract, On Site

(Gambir, Central Jakarta)

- Performed System Integration Testing (SIT) to ensure system quality and functionality prior to implementation.
- Coordinated with Users through Test Management Planning (TMP) to discuss the background, scope, methodology, and testing schedule.
- Prepared and circulated Testing Report as official documentation for user validation and approval.

### Madani Berkelanjutan

(August 2024 – January 2025)

Full Stack Web Developer – Internship, Hybrid

(Pejaten, South Jakarta)

- Rebuilt the website interface using React.js with a modular, reusable component-based architecture.
- Improved website performance from 49% to 84% (Lighthouse Insights) by implementing lazy loading, image compression, and code optimization.
- Developed and implemented RESTful APIs using Node.js (Express) and MySQL to ensure seamless integration between front-end and back-end systems.

### LSP Geospasial

(April 2024 – May 2024)

Front End Web Developer – Freelance, Remote

(Bekasi, West Java)

- Developing web interfaces and collaborating with backend developers to ensure efficient and reliable API integration.
- Helping assessors collect data more efficiently by developing an initial assessment application.

## PROJECTS

### Natask

(2025)

A web-based task management platform designed to empower managers, team leads, and task assigners to efficiently distribute, track, and oversee tasks in real time.

## EDUCATIONS

### Sekolah Tinggi Ilmu Komputer Cipta Karya Informatika

(September 2020 – August 2024)

Bachelor of Computer Science in Informatics Engineering

(Duren Sawit, East Jakarta)

GPA: 3.51
